

Table of contents

1. BILENDER P. ALLAHVERDIEV and HÜSEYİN TUNA Spectral analysis of singular Sturm–Liouville operators on time scales	1
2. ANNA BEDNARSKA On almost polynomial structures from classical linear connections	13
3. MARTIN BOHNER, SRINIVASAN GEETHA, SRINIVASAN SELVARANGAM and ETHIRAJU THANDAPANI Oscillation of third-order delay difference equations with negative damping term	19
4. ALBO CARLOS CAVALHEIRO An existence and approximation theorem for solutions of degenerate nonlinear elliptic equations	29
5. PETER V. DANCHEV Invo-regular unital rings	45
6. SEVER S. DRAGOMIR Some new inequalities of Hermite–Hadamard type for GA -convex functions	55
7. PAWEŁ OCHALIK and ANDRZEJ WŁOCH On generalized Mersenne numbers, their interpretations and matrix generators	69
8. MARIUSZ PLASZCZYK The constructions of general connections on the fibred product of q copies of the first jet prolongation	77
