I. Introduction to Chirality and Asymmetric Catalysis	7
II. Phosphine Ligands for Asymmetric Hydrogenations – Fundamentals	13
II.1. Steric and Electronic Parameters of Phosphorus Compounds	13
II.2. <i>P</i> -stereogenicity of Phosphorus Compounds	16
III. Transition Metal-Complexes and Their Application in the Asymmetric Hydrogenation of Olefins	17
III.1. Stereochemistry of the Asymmetric Hydrogenation	17
III.2. Mechanism of Enantioselective Hydrogenation of C=C bond	20
IV. Enantioselective Hydrogenation of C=C bond	29
IV.1. Typical Olefin Substrates Used in Asymmetric Hydrogenation	29
IV.2. Monodentate Phosphine Ligands	30
IV.2.1. Synthesis of Chiral Monophosphines	31
IV.2.2. Chiral Monophosphines in Asymmetric Hydrogenation Reactions	38
IV.2.2.a. <i>P</i> -stereogenic noncyclic monophosphines	38
IV.2.2.b. <i>C</i> -stereogenic noncyclic monophosphines	40
IV.2.2.c. Chiral three-membered ring monophosphines – phosphiranes	41
IV.2.2.d. Chiral four-membered ring monophosphines – phosphetanes	42

IV.2.2.e. Chiral five-membered ring monophosphines – phospholanes	43
IV.2.2.f. Six-, seven- and eight-membered ring monophosphines	45
IV.2.2.g. Selected chiral monodentate biaryl phosphonite, phosphite and phosphoramidite ligands	49
IV.2.2.h. Application of the mixture of monodentate phosphorus ligands in asymmetric hydrogenation	50
IV.2.2.i. The supramolecular metal catalysis in asymmetric hydrogenation	52
IV.3. Bidentate Phosphine Ligands in Asymmetric Hydrogenation Reactions	57
IV.3.1. Introduction	57
IV.3.2. <i>P</i> -Stereogenic Bidentate Phosphine Ligands in Asymmetric Hydrogenation	59
IV.3.2.a. <i>P</i> -stereogenic diphosphines ligands of BisP* family	59
IV.3.2.b. <i>P</i> -stereogenic cyclic diphosphines ligands	67
IV.3.3. <i>C</i> -Stereogenic Bidentate Phosphine Ligands in Asymmetric Hydrogenation	75
IV.3.3.a. <i>C</i> -stereogenic bis(phosphine) ligands – an introduction	75
IV.3.3.b. <i>C</i> -stereogenic bis(phospholane) ligands of BPE and DuPhos family	76
IV.3.3.c. Modifications of the framework of phospholane moiety in DuPhos and BPE ligands	80
IV.3.3.d. Modifications of the bridge connecting the two phospholane units in DuPhos and BPE ligands	82
IV.3.3.e. Other C_2 -symmetric cyclic phosphine ligands related to DuPhos and BPE structural motif	86
IV.4. Phosphine Ligands in Industrial Applications	88
V. References	89
