

Table of contents

Introduction	7
CHAPTER 1	
Theoretical issues of forecasting and simulation	9
1.1. The concept of forecasting and simulation	9
1.2. Position of forecasting and simulation in science	19
1.3. Classifications and functions of forecasts and simulations	29
CHAPTER 2	
Main elements, phases and forecasting methods	35
2.1. Main components of a forecast	35
2.2. Stages of the forecasting process	39
2.3. Forecasting methods	43
CHAPTER 3	
Forecasting institutions and selected international forecasts	59
3.1. Forecasting institutions	59
3.2. Ecological forecasts	69
3.3. Demographic forecasts	75
3.4. Political forecasts	82
